

Newcastle Interiors Real Estate Statistics

Real Estate Statistics

I love numbers, especially when they help in the decision making process. Here are some figures for you to consider when selling your home.

The 2005 Royal LePage House Staging Poll, conducted by Maritz Research;

Top three interiors features a buyers looks for when considering the purchase of a home:

1. Freshly painted walls – 30%
2. Flooring – 29%
3. Organized storage space – 20%

According to the Canadian Real Estate Association:

2003 Home Gains survey of 2,000 real estate agents found that moderately priced home improvements, ranging from \$80-2,800, used in preparation for home sale yielded the highest rate of return.
